Class History

The start of class of 2023 began in elementary school, where everyone began their journey to the big stage of high school at Macy, Stallbrook, or South Elementary. Without those building blocks of our education we wouldn't be where we are today. Some of the first friendships and bonds were created during these years and so many memories were made throughout our first 5 years of school. The field days, recess, the souper bowl drives, the teachers that shaped our minds into the people we are today, and the people we met during our time there. We will remember these early years of education for many years to come.

All of these schools combined in 5th grade, and for the first time, our class was all together, although people have come and gone over the years, this was the very start of the Class of 2023. We got opportunities to branch out and explore different things we may not have been able to yet, like certain sports, drama club, and everyone was the most excited to start playing an instrument in the band. Although this was when people began to branch out and form some of the groups we still have to the day we all had some common experiences over our middle school years. So many fun events and opportunities were given to us through our time at BMS like, Pi Day, Pumpkin Chunkin, the Culture Fair, the teachers vs students basketball games, field days, and Mr. Chiappones gym class games. We had great times during our years in the middle school, but nothing could've prepared us for what high school had in store for us. High School started in 8th grade for us, which was definitely an awkward transition for us all. We weren't technically high school students yet but we were a part of the high school. Many were afraid of this new level to our academic careers. Entering a new academic environment proved to be a challenge for most of us. But later we started to adapt to the change and learned to handle how high school worked. 8th grade was pretty much an extension of middle school but in a different environment. This was the beginning of many firsts of high school for us, our first high school pep rally, first win block, first assembly with Mr. Forbes. We also got to go to Washington DC with our class, which was our first overnight trip with our grade, since the natures classroom trip was messed up. This was our first experience being in a new building together, and the struggles we faced, we shared together. Having this experience of being in the high school gave us a head start on some other towns and giving us some extra time to adjust before we "really" started.

Next fall we began our first official year of high school being the freshmen in the school. Our freshman year didn't start off the best with triple E causing all fall sporting events and other outdoor events to be started at earlier times.

Meaning no Friday night football games, or really any outdoor activities for the first third of our freshman year. Freshman fall we were granted with some more the opportunities for the first time which include being able to attend our first school homecoming, the ability to play varsity sports, pick our own classes, and the first time we really had freedom of the path of our education. We experienced the first hiccup of our time in the high school towards the end of our freshman year, when we learned about Covid, first we thought we were just going to be out for 2 weeks, but that quickly changed into the rest of the year, which we spent online, our first of many online learning experiences. Covid also put an end to all sports for the rest of the year, winter sports were cut short and spring sports were never played that year.

This quickly cascaded into our sophomore year where we began our school year with online learning. Covid would interrupt our sports seasons with a change to, football and other fall sports would be pushed off to be played later in the school year hoping that covid would not be as severe. Our sophomore year was pretty uneventful as we weren't even in the school for more than half the year.

We were online for most of the time but for some of the year there were the two cohorts where some people would go into school on one half of the week, and then we'd switch and each Wednesday we would have a half day and everyone would be online. Although sports returned this year only minimal fans were allowed to go to games, nothing felt normal our sophomore year, we started to look forward to junior year and I think we can say it was a better time than sophomore year. Junior year began and we were slowly starting to return back to a somewhat normal environment. We were in school everyday but we still had to wear masks. All fans were allowed back at sports games. As everything was starting to return to normal the big questions everyone was asking was "what are your plans for college" or "what colleges have you looked at so far" this was the next big step for many of us. This was when we really began to start planning out our futures and realizing that the end was coming quicker than we knew. We began to get some of the things that we missed out on the year prior back, the most anticipated event though was homecoming. Quickly realized that we would be seniors and graduating soon, and this is where our class started a shift and began to come together more and create bonds amongst the whole grade. We got to experience prom for the first time as this was another highly anticipated event and it was a fun night. After this, it was the end of our Junior year, we saw the seniors go and realize that we were up next, and we were finally the seniors we looked up to, and maybe even feared in our younger years the high school.

Personally I'd say senior year was our best year at this school. Filled with many events from start to finish. From our last first day, to homecoming, to the fall pep rally, our fall was filled with fun events to wrap up our high school careers. Homecoming was the best we've had and it was a great time for the whole school to connect and have an event together.

The winter of our Senior year was when it started to feel real for all of us and I think we all started to feel a little bit of senioritis, some more than others (myself included). Our spring spirit week was a success and we had a lot of participation, especially on college day. It was really interesting seeing all of our classmates representing what they will be doing after high school and seeing how many of my fellow classmates were so excited and ready to take their next step in the future. We continued the tradition of blocking off the parking lot which was a great time, although I think Mr Forbes made us go into school a little bit too early, but I think we can let it slide. Prom was an unforgettable night this year and I think I can speak for almost everyone in saying I had a great time. Grand View in Mendon was the perfect location and the upperclassmen got to have a great night together on our last official day of high school.

Throughout our years in high school our sport teams weren't always the best. But we did have a few good highlights. The first of our sports accomplishments was the covid year when the football team went 5-0 in the wacky fall 2 season. Some believe that group of boys could've gone on to with the state title that year but that is something we will never know since there were no tournaments that year. This past fall we saw our Unified Basketball Team complete an undefeated season with a record of 10-0 on the year. Most recently we have seen our baseball team win the the Tri Valley League Small title in the past few weeks. But throughout our time in BHS the most dominant sport program we saw was the cheer team we watched them win the Tri Valley League 6 times, the past two years they have competed at nationals and in 2022 they brought home a state title for the school.

Looking back on our time at the school I like to think we all had some great times together, especially our senior year. Seeing my classmates grow and change into the people they are today has been really special, and after we graduate we can look back on these memories for the rest of our lives and remember our peers. Congratulations to the entire class of 2023, I wouldn't have wanted to spend it with another group of people and I look forward to seeing what you all accomplish in the future.

Valedictorian Speech

Elsa Robinson

Hi there, fellow classmates of 2023. Before I begin I wanted to take a quick moment to thank everyone who is here tonight: our school administration, members of the school committee, and all of the wonderful teachers who have helped us to reach this momentous occasion we're here for today. I would like to thank my class advisors, who have guided us all over these past few years. I want to thank all of the parents, who are here to see their children at this huge milestone in their lives. And of course, my classmates, who have worked so hard to be able to graduate tonight. Hopefully, I have not missed anyone.

Now I know that a lot of graduation speeches can tend to be cheesy or filled with clichés, so I've decided this time, to have something fresh, I'm going to start off with a list of things I do not want to talk about. I do not want to talk about COVID; we've all heard enough about that in the past few years. I do not want to talk about how short the past few years have felt and how quickly the time has gone by. I do not want to talk about how hard it was for me to write this speech and my original lack of ideas for it. And I do not want to talk about how most of our bathrooms have been closed for our last two years of high school because of a weird TikTok trend.

The thing about clichés though, is that they often exist for a reason. The years did pass quickly, and even if I do not want to talk about it, I feel like I must. When we started school way back in kindergarten, it was so easy to make friends; all you had to do was offer someone a cosmic brownie at snack-time. Things changed as we changed, of course. Friendships shifted, and some ended while new ones began as we grew older and became more mature. Some of us moved away to another town, or just to another school, like BVT, Xaverian, or Norfolk Aggie. From what I've seen, those of us that stayed here at BHS have grown so much in the past twelve years. High school wasn't anything we could have predicted, especially in the case of our class. Even though our high school years were disrupted by a global pandemic almost from the very beginning, we managed to make it here, to our graduation, and after tonight we're finally free.

What I do want to talk about, however, is the future. Our future. We've come a long way from where we began, but we still have such a long way to go. Many of us are going on to college in the fall. There are future doctors, lawyers, and engineers among us. There are actors, artists, musicians, and chefs too. Some of us may even decide to become teachers ourselves, providing opportunities for learning for the next generation. Some of us may decide to go into the military, and bravely serve our country. There are those of us who will not go to college, but will head directly into the workforce, possibly beginning an apprenticeship in a trade. Every one of us will be someone different a few years from now, and high school will just be a part of our past.

What I hope for us is that we will not forget our past and where we came from as we move in to our separate futures. We may not be the richest town in the state, but we've got great sports programs like football, baseball, and unified sports; a music program that won a gold medal just this year, and we have the connections and relationships we've made with the Bellingham community. With the internet today, friendships can truly be forever. Our parents' generation would often lose touch with the friends that they made at our age, but we'll always be one text or one Snapchat away when we want to stay in touch. We should take advantage of this, since technology is in our favor here. We don't need to lose touch with the people we've known all of our lives and have made strong connections with over the years. This graduation may be the end of an era for us, but it's also the start of a new one as well. The word "commencement" in and of itself, which is the term used for a graduation ceremony, even means "the beginning of something". As we move into this new era, it's important for us not to lose ourselves and to keep our relationships that we made with people here at home.

My final words to you all are that we should all celebrate the moment we have come to today. Be proud. This is a huge accomplishment, finishing high school, and a huge weight has been lifted off all our shoulders. It is now time for us to go into the future that we have waited so long for, and to accomplish our dreams. To follow the words that Eleanor Roosevelt once spoke, "The future belongs to those who believe in the beauty of their dreams."

Salutatorian Speech

Jamie Costello

Hello and good evening fellow graduates, faculty, families, and friends. Thank you all for being here today to celebrate this big moment in our lives, graduating from high school. First off I would like to thank all of the teachers and faculty who have helped and guided us throughout the years; we wouldn't be here without you all. Many of the teachers that I had the privilege of being taught by made high school more enjoyable and fun which I am forever grateful for. I would also like to thank my Mom for teaching me the importance of perseverance and to always stand up for what I believe in, my Dad for passing down his love of sports to me and showing me the importance of hard work, and my brother Jason, for always making me laugh, and supporting me. Graduates take a moment to look around at the people in the audience, and think about how they helped you get to this moment, and how thankful you are for them.

As a class, we have experienced so much in only a short amount of time and spent the majority of high school in a global pandemic. We had a very chaotic and different high school experience than what was considered "normal". Our 8th-grade year was the calm before the storm, then Freshman year was cut short due to Covid 19, Sophomore year was filled with hybrid learning, and Junior year we were able to go back to school full time, but had to wear masks. Senior year was a fun, but stressful adventure.

As I reflect back on our high school experience I think about the highs and lows that we all faced together. Many of us struggled with freshmen geometry, and being taught a challenging hands-on subject like chemistry through hybrid learning sophomore year. I remember watching a flame lab through a glitchy, blurry camera during a chemistry class Google Meet, struggling to understand what was going on. But we also still experienced many high school traditions, like spirit week, the homecoming football games, and prom.

We have come so far through these past five years and it feels like just yesterday that we were little eighth graders struggling to navigate high school. I vividly remember sitting in the auditorium at the Blackhawk Experience with Mr. Forbes telling us that it might not feel like it now, but that these five years will go by quickly. He was not wrong, these past five years have flown by in a blink of an eye, but were filled with amazing memories that I'm sure we will never forget, like the annual fall pep rally, homecoming, prom, and bus rides to sports games. One of the best parts of high school are the amazing friendships, and being able to spend time with people that make you laugh and support you every day.

Although this journey wasn't an easy one, we overcame adversity and many challenges to get us to this moment sitting at graduation, eagerly waiting to get our diplomas so we can end this chapter and start a new exciting chapter in our lives. As Taylor Swift once said "Long story short, I survived."

During our Bellingham High School experience we have changed and grown as people, and are about to be let into the real world with our futures in our hands. We are going into a crazy world, that will be challenging, but I know that you all are going to be okay, and have a positive impact on the world. It is crucial for you all to dream big and set goals for your future. As Alex Morgan once said "Dream big because dreams do happen." Remember to not settle, and always strive to be the best version of yourself.

We all will fail at some point in our lives, but the way we will handle that failure is what will define us as people and impact our lives. As Winston Churchill once said, "Success is not final, failure is not fatal: it is the courage to continue that counts." We should learn from our failures instead of letting them set us back. Each and every one of you should persevere through the challenges you face, to achieve your goals in life.

You all have worked so hard to get to this moment, and you should all be very proud of what you have accomplished. I know that you all will achieve great things in the future, and I am excited to see what the future holds for each and every one of you. Bellingham High School Class of 2023, even with all the chaos, we survived. Thank you!!!

Class President Speech

Thomas Magee

Good evening family, friends, teachers and fellow classmates. Before I begin I would like to say a big thank you to two teachers who have dedicated their lives to teaching the students of Bellingham: thank you to Mr. Cleary and Mr. Delaney for fifty years of service to the Bellingham School community.

Let's all give them a big round of applause

I would also like to thank everyone here for supporting the Class of 2023 on one of the most important days of our lives. Today we conclude our journey as high school students and forge a new path into adulthood. Our ability to forge this path comes from our determination that has grown over the last five years. Four years, nine months, four days, and eleven hours ago we began our journey as high schoolers. This journey, as most do, has had its highs and lows, but all of these experiences were meant to prepare us for the next stage of our lives. Our tenacity through these challenges would not have been possible if it were not for the incredible support system that has consisted of our family, friends, and teachers. While it is us who will be walking across the stage today, it is the effort of our entire community that has allowed us to be able to do so.

Bellingham High School has created an environment that has allowed us to form relationships with each other that have proven themselves strong enough to last a lifetime. The friendships I, and all of us here, have formed will not dissipate, no matter the physical distance that may form between us. The bonds of family and friendship are what make us stronger. Our bonds are what have propelled us to be sitting here today and our bonds are what will carry us through the rest of our lives. We have the entire possibilities of the world within our grasp; these are possibilities I have faith we will all take complete advantage of.

We will leave Bellingham High School today, but the spirit of community that it has formed within all of us will never leave. We leave a part of ourselves within every friend we make and these pieces, when put together, form the class of 2023. The reality of all of us sitting here today shows me the strength of our bond. As we turn the page into the next chapter of our lives we will always share this spirit; this undying bond that will see us through the rest of our lives. I do not want you to see today as a conclusion but instead as the beginning of your incredible impact on the world. I will leave you with a quote from Winston Churchill. "Now this is not the end. It is not even the beginning of the end. But it is perhaps the end of the beginning." Thank You and congratulations to the Class of 2023.

the longest reign

Thousands of mourners line the Long Walk to watch the coffin of Queen Elizabeth II as it arrives at Windsor Castle. Britain's longest-reigning monarch died Sept. 8 at the age of 96 after 70 years on the throne. Her oldest son became monarch upon her death and assumed the title of King Charles III, while his oldest son and heir, Prince William, was granted the Prince of Wales title. Photo credits: Newscom

A phone displays the Twitter account of billionaire Elon Musk and his tweets from Nov. 15. He was already the CEO of Tesla and SpaceX when he became sole owner of Twitter for \$44 billion, and plunging stocks caused him to lose his rank as the world's richest man. Upon taking over the social media platform, Musk made a series of controversial decisions, including mass layoffs, implementation and then de-implementation of the Twitter Blue account verification program, and asking remaining employees to commit to working "long hours at high intensity" or leave the company. PAY UP

Protesters rally outside the Department of Education, calling on President Joe Biden to abolish all student loan debt. Their demands were partially answered in August, when Biden signed an executive order forgiving up to \$20,000 of debt for millions of Americans. The legislation was quickly challenged in court, with opponents claiming the president didn't have the authority to carry out the order. Photo credit: Newscom

BRITTNEY'S BACK

WNBA star Brittney Griner steps onto American soil for the first time in 10 months. The two-time Olympic gold medalist was detained on drug charges when she flew to Russia to play in the off-season. Despite international calls for her release, Griner was convicted and sent to a penal colony to serve her nine-year sentence, but returned to the U.S. in December as part of a prisoner swap with Russia.

ELECTION YEAR

The makeup of the U.S. Senate and House of Representatives changes following the Nov. 8 election. Control of the House flipped to Republicans and the Senate remained in the hands of Democrats. The vote for Speaker of the House was notable because it took four days and 15 rounds of voting to elect Kevin McCarthy, the most rounds since 1859 and the first time since 1923 it took more than one vote.

IMPORTANCE OF CPR

Following the on-field collapse of NFL football player Damar Hamlin, the American Heart Association reported a 620% increase in page views on its CPR pages. According to the CDC, follow the below steps if you see someone in cardiac arrest:

1. Call 911 right away.
2. Give CPR. Push down hard and fast in the center of the chest at a rate of 100 to 120 pushes a minute. Let the chest come back up to its normal position after each push. The American Heart Association recommends timing your pushes to the beat of the song "Stayin' Alive."
3. Continue giving CPR until medical professionals arrive or until a person with formal CPR training can take over. Photo credit: Alex Streicher

Dustin Johnson takes a shot on hole 3 during the semifinals of October's LIV Golf Invitational in Miami. LIV Golf was a controversial new league due to its source of funding: Saudi Arabia's Public Investment Fund. Saudi Arabia was accused of using "sportswashing" to distract the public from allegations of human rights violations. Photo credit: Newscom

THE NEW KING OF THE COURT

Los Angeles Lakers forward LeBron James shares an emotional moment with Kareem Abdul-Jabbar after breaking the NBA's all-time scoring record. James made his 38,388th point in the Feb. 7 game against the Oklahoma City Thunder. This broke the record set by Abdul-Jabbar in 1984. Photo credit: Newscom

LET IT FLOW

Tourists watch Hawaii's Mauna Loa and Kilauea volcanoes erupt in tandem for the first time since 1984. Fountains of lava as high as 200 feet tall burst from Mauna Loa on Nov. 28, just 21 miles from its smaller neighbor, Kilauea, which had been erupting for the previous year. The twin eruptions did not endanger local homes but worried officials when the flow crept close to roads and highways connecting the island. Photo credit: Janice Wei/National Park Service

to the moon & back

Launch director Charlie Blackwell-Thompson looks out to watch the Orion spacecraft as it's carried to the launch site. The spacecraft took off Nov. 16 on a path to circle the Moon and return to Earth. This was the first stage of NASA's Artemis program, which prepared the agency to send humans to the Moon again and eventually to Mars. Photo credits: NASA/Joel Kowsky

DISASTER STRIKES

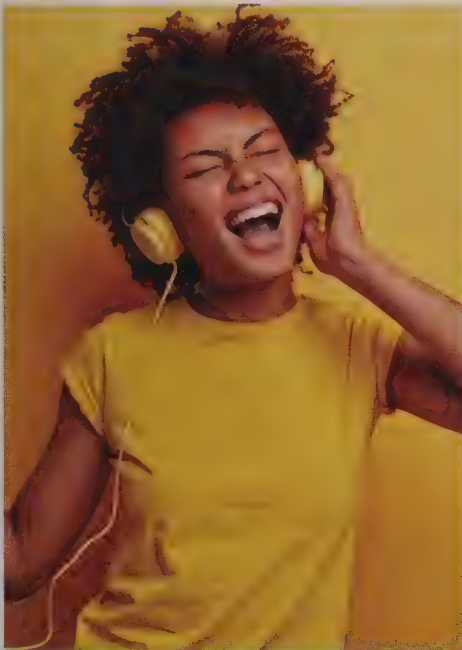

Sept. 15 – The boil water notice order in Jackson, Mississippi, is lifted after extreme flooding damages the city's water treatment facility, leaving 150,000 residents without clean drinking water for weeks. Photo credit: Staff Sgt. Connie Jones/U.S. Army National Guard

Sept. 28 – An animal services worker in Fort Myers Beach, Florida, transports a cat lost during Hurricane Ian back to its owner. The Category 4 storm caused at least 146 fatalities in Florida, just ten days after Puerto Rico suffered major damage from Hurricane Fiona. Photo credit: Newscom

Feb. 14 – Surrounded by the destruction from a 7.8 magnitude earthquake, Turkish residents await a hot meal at a food distribution point. The quake hit Turkey and Syria Feb. 6, killing more than 47,000 people and leaving millions of people without permanent shelter. Photo credit: Newscom

LISTEN UP

A young woman rocks out to music through headphones, which experts say should be done with precautions in place. A study published in the journal *BMJ Global Health* revealed that listening with headphones at loud levels and attending loud venues like concerts is putting 1 billion young people at risk for hearing loss. Experts said hearing loss could be prevented by turning down the volume when wearing headphones and using ear protection at concerts. Photo credit: Shutterstock

A STAR IS BORN

One of the first images from NASA's James Webb Telescope shows the "Cosmic Cliffs" in stunning detail. Images of this star-forming region of the Carina Nebula were captured with infrared light that allowed Webb's cameras to see through cosmic dust and reveal never-before-seen areas of star birth. Although they looked somewhat like cliffs we'd see on Earth, these Cosmic Cliffs were made up of gas and space dust, with the tallest peaks stretching seven light years high. alarm in california

Teresa Vaughn clears mud from the yard of her Santa Barbara home. Massive flooding killed at least 17 people and caused massive damage across central and southern California in the first half of January. The previously drought-stricken state received rainfall amounts 400% to 600% above average. Photo credits: Newscom

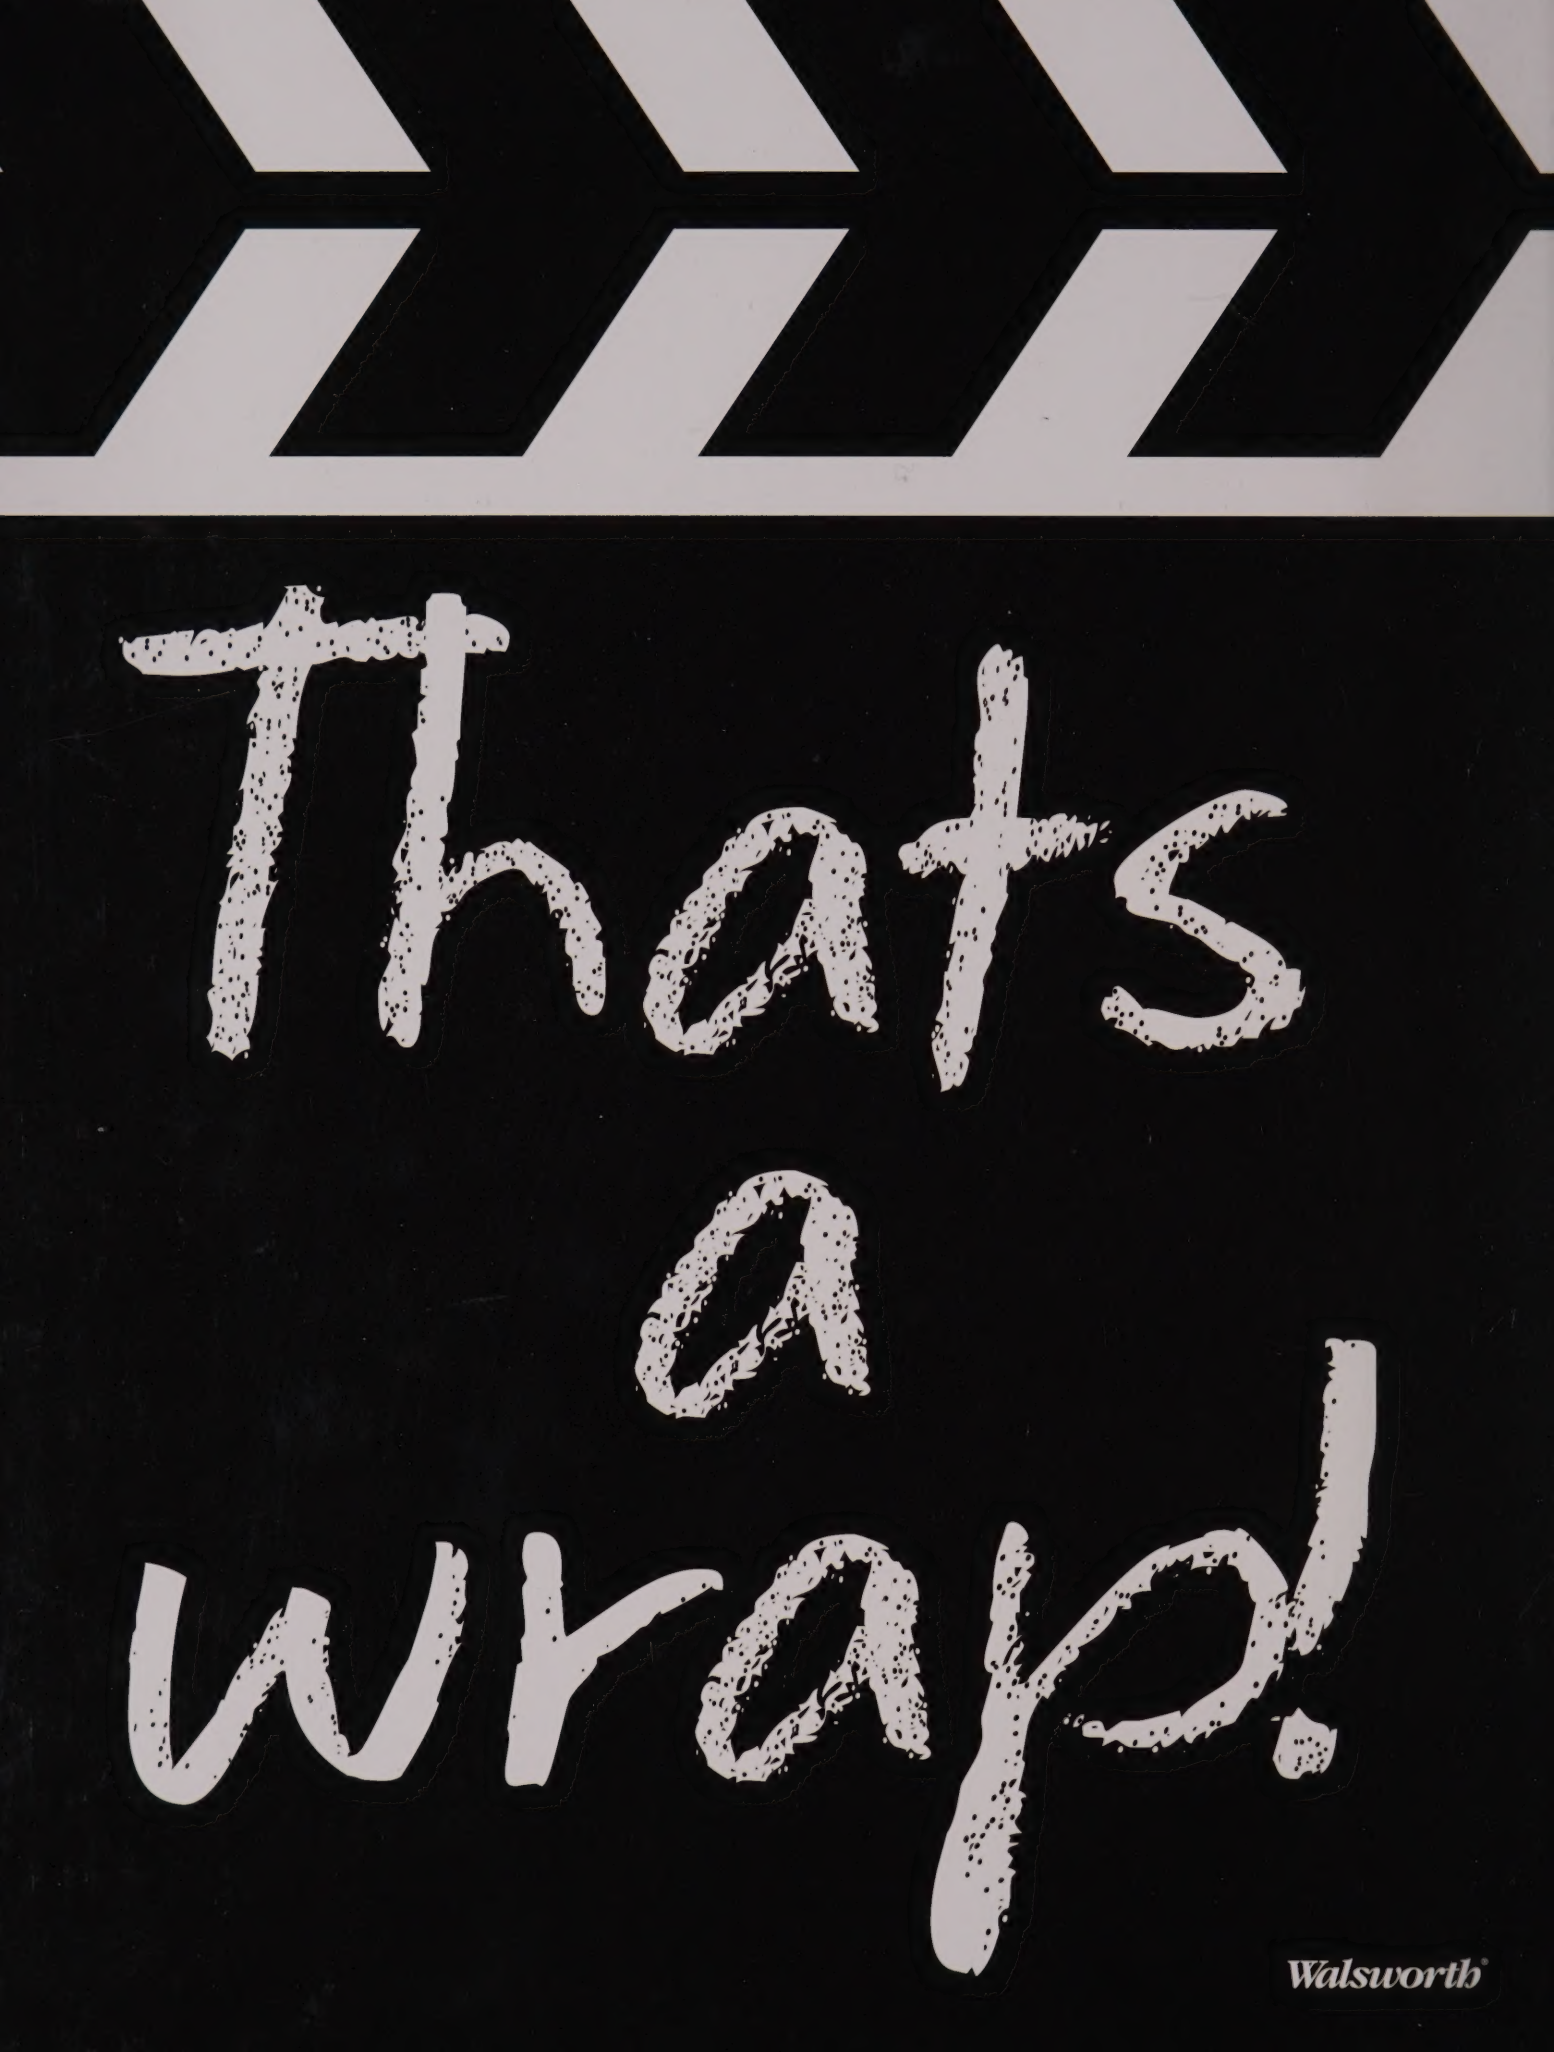

OH-ZONE SHE DID IT

NASA finds continued improvement of the ozone layer over Antarctica. The U.N. announced that the ozone — a thin layer of gas that protects the earth from radiation — was on track to recover within about four decades. This success was attributed to the Montreal Protocol, which was adopted in 1987 and phased out the use of ozone-depleting chemicals like chlorofluorocarbons that had previously been widely used in aerosol cans and as refrigerants.
